The Race Base – Where Victories Begin

Professional slope preparation for FIS-compliant racecourses.

Whether for a World Cup event or a national championship – only a perfectly prepared racecourse ensures maximum safety for athletes and smooth event operations.

Where expertise meets racing passion.

Discover how solid know-how
and reliable procedures equip snow groomer operators
and event teams for FIS-compliant ski races.

“The Race Base” is a professional training program focused on the **preparation of racecourses in line with FIS standards**. It is aimed at snow groomer operators, technical resort staff, and members of ski race organizing committees.

Our training delivers the technical knowledge, workflows, and safety-critical details required to prepare, operate, and efficiently return a ski slope used for racing back to regular commercial skiing.

The program is structured into **two modular phases**:

- ▶ **Module 1: Systematic slope preparation**
- ▶ **Module 2: FIS-level fine-tuning for competition**

Your benefits at a glance

- ✓ **Practice-oriented training** for FIS-compliant racecourse preparation
- ✓ **Hands-on instruction** for operators, technicians, and organizers
- ✓ **Improved coordination and safety** during race operations
- ✓ **Efficient transition of the slope back to tourism** use after the event
- ✓ **Cost reduction** through machine-friendly operation and optimized use of resources

Each module can be **booked individually** or as a **package** – as a **theoretical seminar**, **practical hands-on training**, or an **effective combination of both formats**.
